LAB University of Applied Sciences

A large-scale circular economy laboratory will be completed on the Lahti campus of LAB University of Applied Sciences. The circular economy laboratory will significantly increase research, development and innovation activities in the Päijät-Häme region. The main goal of the laboratory is to act as a circular economy operating environment implementing the Lahti region's circular economy strategy. It is designed to serve companies in the neighboring areas in particular, as well as project activities and teaching at LAB and LUT.

Immanuel Kant Baltic Federal University

Rector Alexander Fedorov presented the draft of the new IKBFU campus to the Minister of Science and Higher Education of the Russian Federation Valery Falkov. Its area is 29 hectares. Today, there are already two educational and administrative buildings there, sports facilities and university dormitories. The construction of the new buildings will contribute to the concentration of university's facilities in one location.
